

help is just a phone call away

Supportive Assistance for Individuals and Families

SAIF is an intensive case management program provided to TANF and GA recipients that have been on cash assistance for 48 months or more, who have been granted a 24 month extension of their benefits.

SAIF Intensive Case Managers work closely with the clients, as well as their CWA/MWA case managers, in order to assist the clients to remove any identified barriers that may have hindered the client from becoming self-sufficient. Intensive Case Managers will provide the client with intensive follow up procedures to ensure that they receive any services that may be necessary for the clients to become self-sufficient.

Program Goals

- To close welfare cases by assisting participants reach self-sufficiency by securing unsubsidized employment.
- To assist participants, who fit certain criteria, attain exemption status and moves towards alternate benefits such as Social Security.
